

Our Business

Sustainability and CSR

As issues of climate change and sustainability dominate the social, political and corporate landscape, organisations are under increasing pressure to set and deliver against their Sustainability, CSR, Ethical Investment and Supply Chain commitments.

We collaborate with our clients to develop a clear sustainability and CSR strategy, responsible sourcing and supply chain arrangements. Our extensive experience across sectors from Financial Services to FMCG to Fashion and our broad network enable us to help shape sustainability targets and strategy for any organisation.

Our focus on added value means we not only help shape strategy, but to actively implement it across organisations, transforming operations, culture and market engagement.

About Us

Map Room is a specialist consultancy practice operating across markets in the UK, US and Mainland Europe. We provide expertise, specialist resourcing and advisory services to clients across complex specialisms including Risk Management, Transformation, Resilience and Sustainability

Practitioner Led

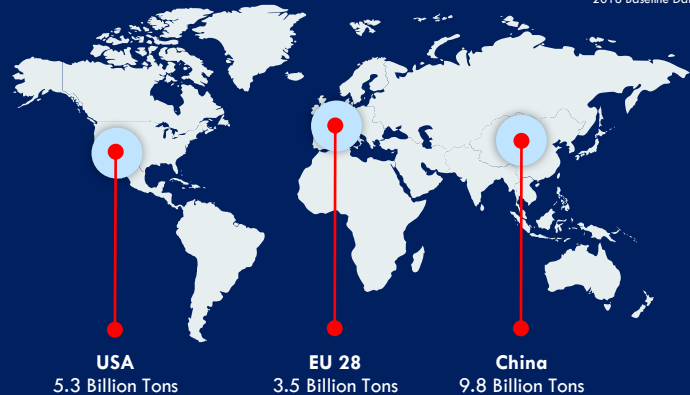

As a practitioner led organisation our Directors, Consultants and Associates are experts in their respective fields with a depth and range of experience un-matched by traditional consultancy firms. Our teams are built on talented individuals with real-world knowledge and application.

Our History

Map Room was formed in 2012 and is a Bateman Collins International Group company. The Group was founded with the objective of transforming traditional markets including executive search, consultancy and leadership advisory. Now operating across three continents from our London HQ we deliver on a global scale in the most complex of markets.

Global Carbon Emissions

2018 Baseline Data

Global Sustainability Challenge
